

	Вопрос	Ответ										
<input type="checkbox"/>	Three students pass an exam. The probability that the exam will be passed on "excellent" by the first student is equal to 0,3; by the second – 0,7; and by the third – 0,8. What is the probability that the exam will be passed on "excellent" by neither of the students?	0,46										
<input type="checkbox"/>	10 of 20 savings banks are located behind a city boundary. 4 savings banks are randomly selected for an inspection. What is the probability that among the selected banks appears inside the city 2 savings banks?	0.5										
<input type="checkbox"/>	The probabilities that three men hit a target are respectively 1/3, 1/4 and 1/2. Each man shoots once at the target. What is the probability that exactly one of them hits the target?	3/4										
<input type="checkbox"/>	A problem in mathematics is given to three students whose chances of solving it are 1/3, 3/4, 3/5. What is the probability that the problem will be solved?	9/15										
<input type="checkbox"/>	The probability that a boy will not pass M.B.A. examination is 1/5 and that a girl will not pass is 3/5. Calculate the probability that at least one of them passes the examination.	16/25										
<input type="checkbox"/>	During the experiment the following results have been obtained: 10,20,30,40,50. Find the sample dispersion of obtained results from the experiment.	1000										
<input type="checkbox"/>	Find the coefficient of variation of the given distribution: <table><tr><td>x_i</td><td>n_i</td></tr><tr><td>2</td><td>1</td></tr><tr><td>4</td><td>7</td></tr><tr><td>5</td><td>2</td></tr></table>	x_i	n_i	2	1	4	7	5	2	15
